

• Astana AS760

Astana AS760 is a versatile profile suitable for all types of roofing and cladding application. Available in Zinalume®, Clean Colorbond®, and PrimaMaju™.

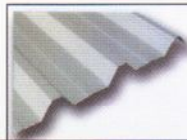

• SANKO Speed Deck

SANKO Speed Deck, as its name implies, allows speedy fixing. Its bold and strong provides a smart appearance which is ideal for roofing, cladding, fascia and doors.

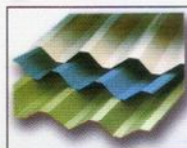

• SANKO SK-Rib 38 II

SANKO SK-Rib 38 II is a unique metal roofing system that allows bolting on its 38mm height crest while maintaining superior rainwater discharge properties at very low gradient. It is also able to span at internal purlin spacing of 1.8 meters by just using the 0.42mm "E" Base Steel Thickness material.

• SANKO Roof Deck

SANKO Roof Deck which is available either in Zinalume®, Clean Colorbond® and PrimaMaju™, depicts a bold and strong profile that is suitable for both low and high roof pitches. Its deep corrugations also act as rain gutter for smooth run-off of water.

• SANKO Grip Deck

Long length SANKO Grip Deck panels cover large areas quickly and swiftly. In addition to being strong and low mass, it also gives a clean, neat look which is most suitable for low pitch roofs. Grip Deck is also available in Zinalume®, Clean Colorbond® and PrimaMaju™.

• SANKO Gripseal S-63

SANKO Gripseal S-63 is a boltless roofing profile that possesses outstanding functionality and design for long span roofing which utilises SANKO's distinctive concealed fixing method by attaching each rib to the clips fixed on a concealed roof connector, providing better holding power against uplift. It is a quality profile specially designed for the cost conscious building industry.

• SANKO Seamlock

SANKO Seamlock is a unique long span metal roofing system that is fixed using a distinctive concealed fixing method without any fastening bolts on the roof surface. Each side lap of SANKO Seamlock is locked and sealed using a revolutionary seaming machine. A unique roofing system that possesses advantage that far outweigh any other roofing systems currently available in the market.

• SANKO S-60

SANKO S-60 profile has a dynamic "V" pattern. It endows the roof top with a beauty that accentuates the building's exterior appearance. S-60 has enjoyed tremendous popularity from specifiers and discerning investors.

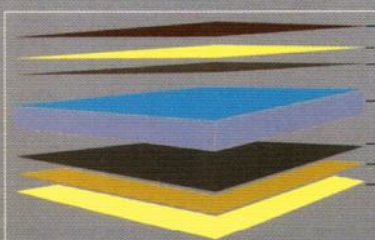

• SANKO Sapporo Roof

SANKO Sapporo Roof offers all the advantages of long-run roofing with the added attraction of a tiled look. A natural choice for commercial or domestic roofings that blends well with the environment and capable of lasting as long as your house or longer. SANKO Sapporo Roof is made from high strength, corrosion resistant galvanised steel material and available in Zinalume®, Clean Colorbond® and PrimaMaju™.

• SANKO Radial Roof

SANKO Radial Roof is created for variety in architectural design. It can be used on its own or as a complement to any other SANKO long-span profiles to give a subtle distinction to any roofings.
